PKvitality joins Dassault Systèmes' 3DEXPERIENCE Lab partnership program.

Paris, November 25, 2019 – Pkvitality, a French company specialized in MedTech, has joined Dassault Systèmes' 3DEXPERIENCE Lab Program, making Dassault Systèmes its official partner for IT applications for the development of K'Watch project, a Continuous Glucose Monitor (CGM) in a form of a smartwatch.

Dassault Systèmes is the world's leading vendor of 3D Modelling, Simulation and Project Lifecycle Management software.

Being a member of 3DEXPERIENCE Lab partnership program gives Pkvitality access to training and coaching from a community of Dassault Systèmes experts and allows us to leverage the industry leading software such as SOLIDWORKS, CATIA and SIMULIA as a part of the 3DEXPERIENCE platform.

3DEXPERIENCE

The usage of all these key software programs is essential for the successful development of its product line and roadmap given the complexity of K'Watch project.

- SOLIDWORKS and CATIA are world's leading CAD software programs. Pkvitality will use them in the product development of K'Watch.
- SIMULIA delivers realistic simulation applications that enable users to explore real-world behavior of product, nature and life. Pkvitality will leverage SIMULIA to design its CGM sensor by simulating the skin from a mechanical and fluidic perspective.
- ENOVIA consists of a broad portfolio of technical and business applications. We will use the Quality and Compliance Management system, enabling us to control the development. This system will be able to support our long-term roadmap.

In addition to software access and training, Dassault Systèmes will also act as a business accelerator, supporting Pkvitality with marketing and communication of the K'Watch project. This support gives Pkvitality access to a much wider network of potential partners and investors.

About Dassault Systèmes

Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way

products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 250, 000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com

About PKvitality

PKvitality is an advanced bio-wearable start-up currently working on K'Watch, a painless and discreet Continuous Glucose Monitoring (CGM) device in the form of a smartwatch. It will enable a precise and continuous monitoring of systemic glucose level anytime and anywhere. Using the same technology, PKvitality is also working on K'Watch Athlete, a smartwatch which will provide real-time monitoring of their lactic acid – an indicator of muscle fatigue – to significantly improve an athlete's training and performance.
